What is FanHive?

What is FanHive?

FanHive adalah sebuah aplikasi website yang fungsinya mengarsipkan karya tulis fiksi penggemar di mana pengunjung dapat berbagi cerita dan memberikan tanggapan, berupa komentar dan heart (mekanisme like).

Why use FanHive?

Engage with Readers

Menyediakan platform yang interaktif dalam berbagi karya tulis fiksi penggemar melalui fitur komentar, heart (like), dan mengikuti penulis

Powerful Writing Tool

Berikan penekanan lebih pada karya-mu dengan fitur rich-text editor, menawarkan kapabilitas styling (bold, italic, underline, dll.)

Easy Menu Navigation

Menawarkan tampilan menu yang straightforward, intuitif, dan mudah dimengerti

Customizable

Menawarkan kebebasan dalam tampilan-mu, seperti mode light/dark, gambar profil yang bisa diubah

CRUD Features

Create

Membuat akun, cerita, banyak chapter dari cerita, komentar, heart, tag, fandom

Update

Mengubah sinopsis cerita, fandom cerita, tag cerita, status cerita, konten chapter dari cerita, profile picture akun, background picture akun

Retrieve

Memperoleh semua cerita, chapter dari cerita, detail akun, cerita berdasarkan follow, cerita berdasarkan heart, berdasarkan akun, berdasarkan pencarian judul

Delete

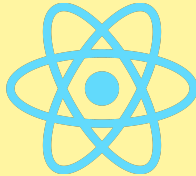

Menghapus cerita

Tools/Framework

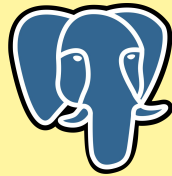

Frontend

- React JS
- JavaScript
- Yarn Package Manager

Backend, API

- Node JS + Express
- JavaScript
- Yarn Package Manager
- PostgreSQL Serverless di Console Neon

Dependencies

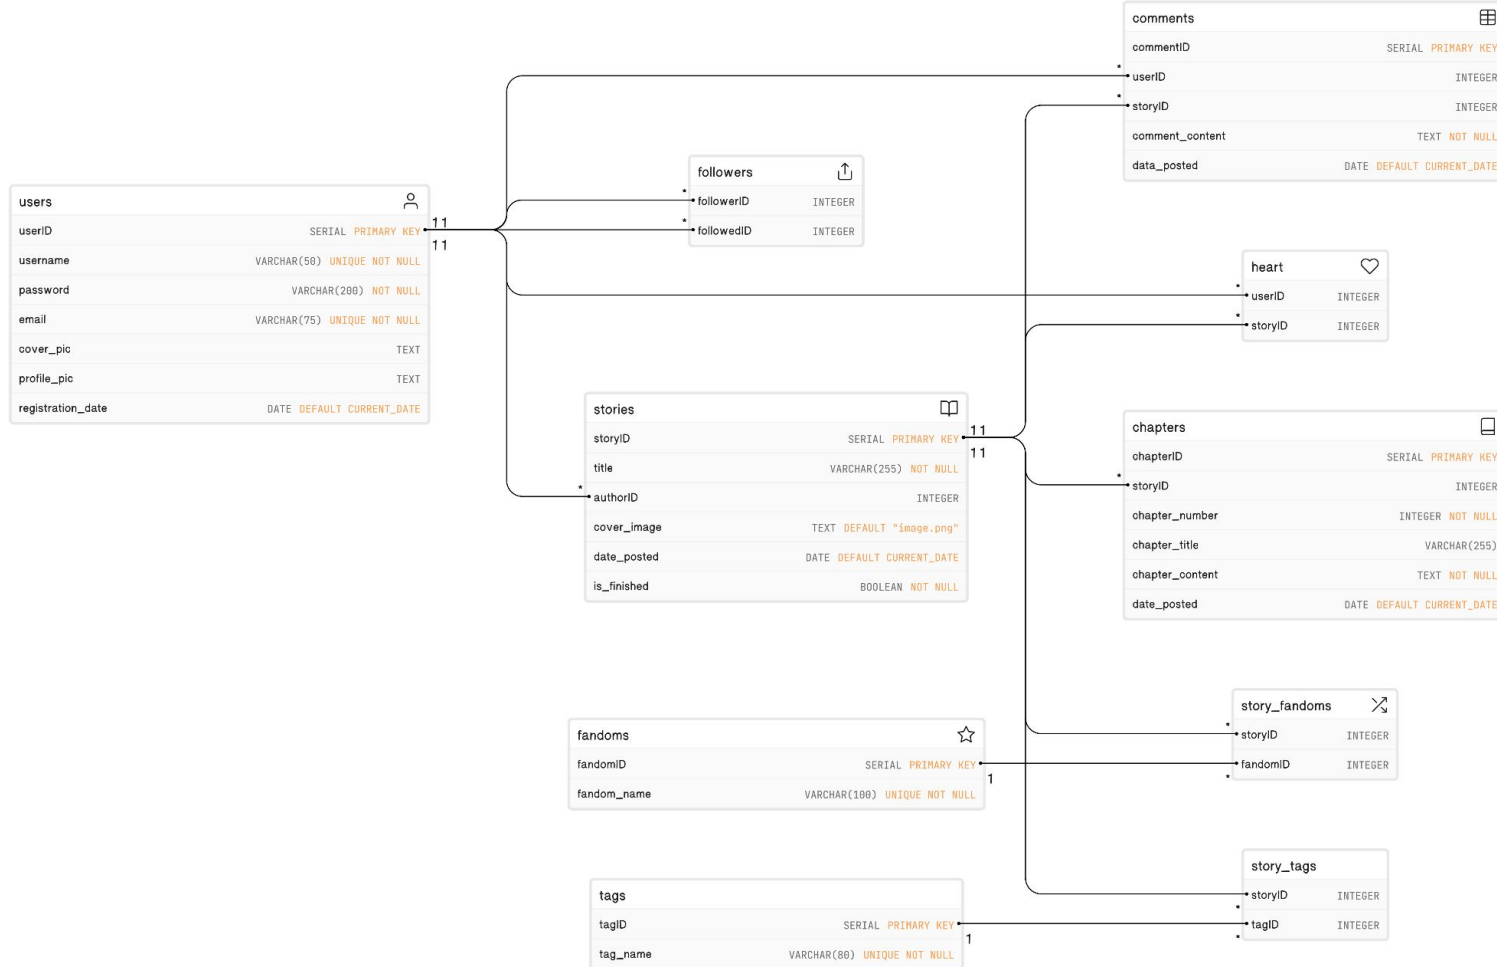

Frontend

- Axios (Request HTTP)
- DOMPurify (Sanitasi HTML dan mencegah Cross-Site Scripting)
- Material UI: Icons Material
- TanStack React-Query v4 (Otomasi logika fetch data)
- React Router (Routing web page)
- React Quill (Rich-text editor)
- Sass (Advanced CSS styling)

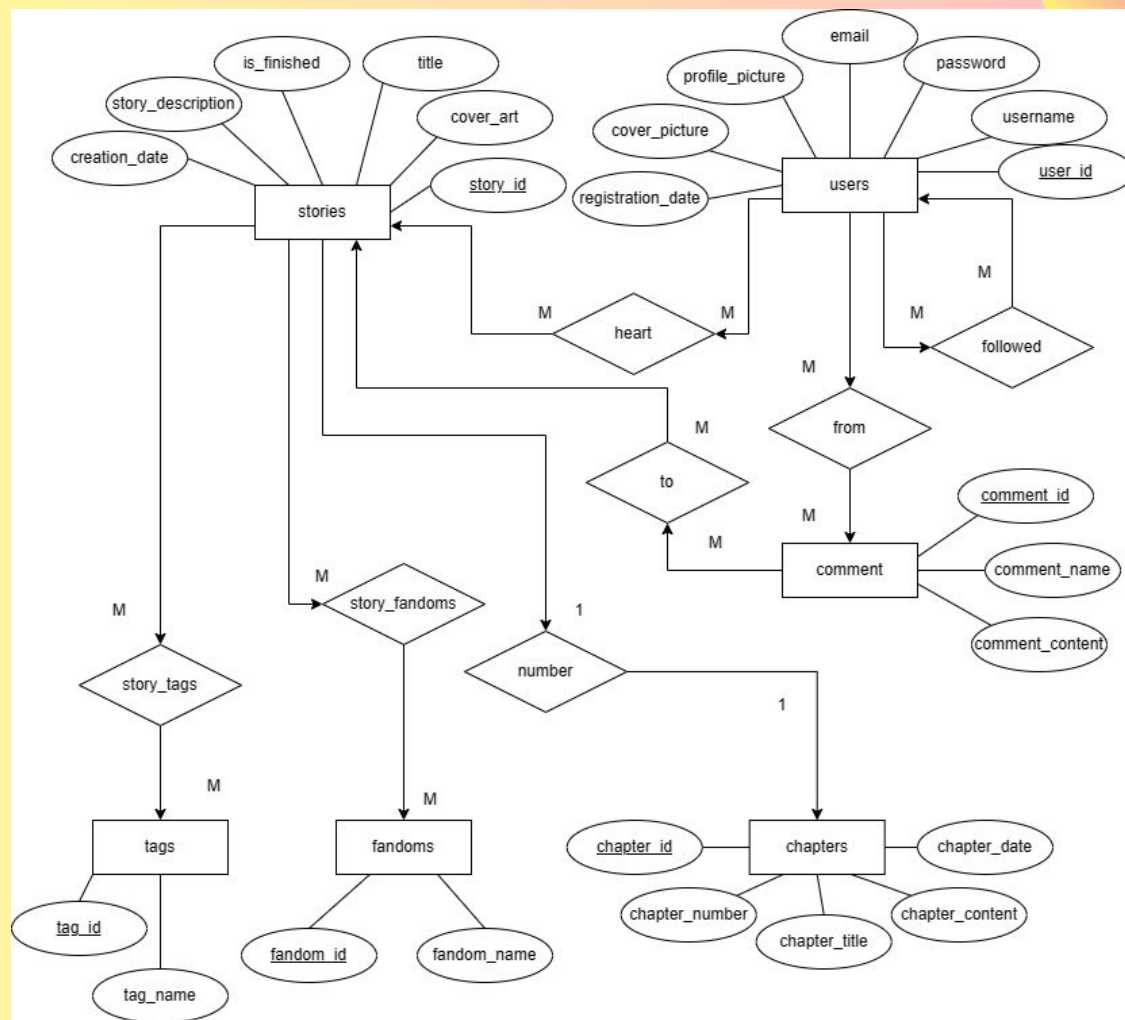

Backend, API

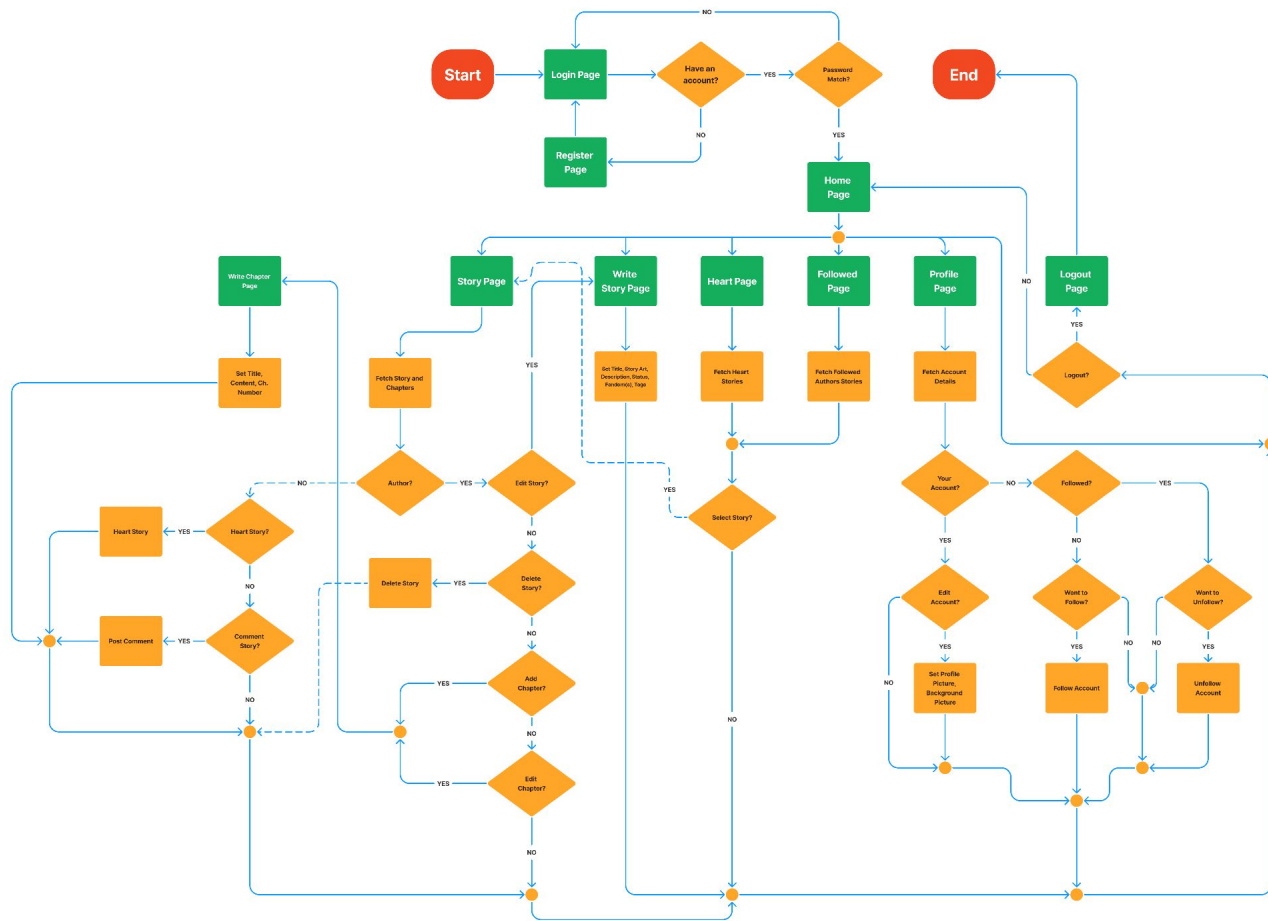

- Express (RESTful API)
- Bcryptjs (Hash password)
- Body-parser (Parsing request body)
- Cookie-parser (Parsing cookie)
- Cors (Koneksi ke API pada URL tertentu saja)
- Dotenv (Environment variables)
- Jsonwebtoken (Access Token)
- Multer (Upload Image)
- Nodemon (Run script untuk menjalankan app langsung)
- Pg (Pooling koneksi untuk PostgreSQL)

FanHive

80%

Tingkat kesulitan pengerjaan proyek karena mempelajari frontend website dari 0 dan framework terkesan asing, serta tabel dan detail yang banyak mengakibatkan query PostgreSQL yang panjang.

A Closer Look

Login Page View

The login page features a dark-themed hero section on the left with a collage of romantic fanfiction images. The 'FanHive' logo is prominently displayed in white. Below it, a paragraph describes the site's focus on romantic fanfiction. A 'Register' button is located at the bottom of this section. To the right, a white box contains the 'Login' heading, followed by input fields for 'Username' and 'Password', and a yellow 'Login' button.

FanHive

Embark on a romantic journey through fanfiction's enchanting realm. Uncover captivating pairings that kindle your heart with passion, igniting emotions that flutter and soothe.

Known Bugs

Known Bugs

Bug yang diketahui, beserta kemungkinan solusi ke depannya

Word Count Tidak Sesuai pada Halaman Utama	Bisa menerapkan subquery untuk tabel chapter, namun akan menambah overhead karena halaman utama bisa memuat banyak sekali cerita. Selain itu, tidak begitu efektif karena chapter tidak ditampilkan pada halaman utama. Solusi lainnya adalah membuat kolom/atribut word count pada tabel Stories dan Chapter, sehingga meringkas query.

**What's
Ahead?**

TO DOs / Further Improvements

Fitur tambahan yang dapat diimplementasikan apabila tidak terbatas waktu.

Pagination	Pagination membatasi jumlah cerita yang dimuat pada halaman web, sehingga bisa mengoptimalkan performa pada backend dan database PostgreSQL.
Sorting dan Searching Interaktif	User dapat memilih untuk menampilkan cerita berdasarkan kurun waktu tertentu dan searching lebih lanjut dengan auto-suggestion.
Searching Atribut Tambahan	Search tag, fandom, deskripsi, judul chapter, bahkan konten chapter.
Stack Search	Bisa menerapkan operasi AND/OR dalam pencarian lebih dari satu tag/fandom.
Tambahan Keamanan	Regex untuk kriteria password dan/atau username.
Update Informasi Profile Tambahan	Mengubah password lebih plausible dibandingkan mengubah username.

Thanks
